

PVC Distributor Admin — Product Requirements Document

Version: 1.0

Date: May 2026

Business Type: PVC Raw Material Distribution (Furniture Industry)

1. Business Overview

A PVC distribution business that sources raw materials (PVC sheets, holo sheets, pipes, etc.) from suppliers like **Greenova** and sells them to downstream customers (furniture manufacturers, retailers, etc.). The admin system must manage the full lifecycle: procurement → inventory → order fulfillment → delivery → billing → payment tracking → restocking alerts.

2. Modules & Requirements

Module 1: Product & Inventory Management

1.1 Product Catalog

- Add products with the following attributes:
 - **Product Name** (e.g., PVC Sheet, Holo Sheet, Pipe)
 - **Category** (Sheet / Pipe / Accessories)
 - **Supplier** (e.g., Greenova)
 - **Dimensions** (e.g., 22×78, 25×98 — selectable from predefined list)
 - **Product Number / SKU** (e.g., 119, 120, 121)
 - **Unit** (piece / sheet / meter / kg)
 - **Purchase Price** (cost from supplier)
 - **Selling Price** (price charged to customer)
 - **GST / Tax Rate** (if applicable)

1.2 Godown (Warehouse) Stock Management

- Real-time stock quantity per product (per dimension/SKU)

- Manual stock entry (when goods arrive from supplier)
- Stock deduction on every outgoing order
- View current stock level per product/SKU at a glance
- Low stock threshold setting per product (e.g., alert when quantity < 10 sheets)
- Stock history log (who added/removed, when, how much)

1.3 Restock / Wishlist Cart

- A dedicated "Restock Cart" where admin can flag items that need reordering
 - System auto-suggests items to restock based on:
 - Stock falling below the defined threshold
 - High sales velocity (most sold items)
 - Admin can manually add/remove items from restock cart
 - Cart shows: Product Name, SKU, Current Stock, Suggested Reorder Quantity
 - Option to convert Restock Cart into a Purchase Order (sent to supplier)
-

Module 2: Supplier Management

2.1 Supplier Profiles

- Add/edit supplier details:
 - Supplier Name (e.g., Greenova)
 - Contact Person, Phone, Email
 - Address
 - GST Number / Business ID
 - Products supplied (linked from product catalog)
 - Payment terms (e.g., Net 30, advance, etc.)

2.2 Purchase Orders (Inward Orders)

- Create purchase orders to suppliers
- Fields: Supplier, Products + Quantities, Expected Delivery Date, Notes

- Track purchase order status: Pending / Partially Received / Received / Cancelled
 - On receipt of goods → update godown stock automatically
 - Maintain purchase invoice records from supplier
-

Module 3: Customer Management

3.1 Customer Profiles

- Add/edit customer details:
 - Customer Name / Business Name
 - Contact Person, Phone, Email
 - Delivery Address (can have multiple addresses)
 - GST Number
 - Customer Type (Retail / Wholesale)
 - Credit limit and payment terms

3.2 Customer Order History

- View all past orders per customer
 - Outstanding payment summary per customer
 - Top purchased products per customer
-

Module 4: Sales Order Management

4.1 Creating a Sales Order

- Select Customer
- Add Products (with dimension/SKU, quantity, price)
- System checks godown stock automatically:
 - If stock is sufficient → mark as "Available"
 - If stock is insufficient → show warning with available quantity
- Notes / special instructions field

- Order status: Draft / Confirmed / Processing / Dispatched / Delivered / Cancelled

4.2 Order Fulfillment Flow

1. Order created
 2. Stock availability checked
 3. Order confirmed
 4. Dispatch arranged (see Delivery Module)
 5. Goods dispatched → stock deducted
 6. Delivery confirmed
 7. Bill generated
-

Module 5: Delivery & Logistics Management

5.1 Delivery Options

For each order, admin selects delivery type:

- **Our Vehicle** — we arrange transport, vehicle cost is additional
- **Customer Vehicle** — customer sends their own vehicle to pick up

5.2 Vehicle Management (for Our Vehicle deliveries)

- Add vehicles: Vehicle Number, Type (Tempo / Truck / etc.), Driver Name, Driver Phone
- Assign vehicle to an order
- Track delivery status: Scheduled / In Transit / Delivered

5.3 Delivery Cost

- When delivery type = "Our Vehicle":
 - Enter vehicle/transport cost
 - Option to pass cost to customer (added to bill) or absorb internally
- When delivery type = "Customer Vehicle":
 - No transport cost charged

5.4 Delivery Tracking

- Each delivery has a status timeline:
 - Order Confirmed → Goods Packed → Dispatched → In Transit → Delivered
 - Estimated delivery date
 - Actual delivery date
 - Delivery notes / proof (optional photo upload or notes)
-

Module 6: Billing & Invoice Management

6.1 Customer Invoice (Sale Invoice)

- Auto-generated after dispatch / delivery
- Invoice contains:
 - Invoice Number (auto-incremented)
 - Date
 - Customer details + GST
 - Itemized list: Product, Dimension/SKU, Qty, Unit Price, Total
 - Transport charges (if applicable)
 - Subtotal, GST/Tax, Grand Total
- Option to print / download as PDF
- Option to share invoice via WhatsApp / Email

6.2 Internal Purchase Invoice (from Supplier)

- Record invoices received from Greenova / other suppliers
- Link to corresponding purchase order
- Track payment to supplier: Paid / Unpaid / Partially Paid

6.3 Invoice History

- Search and filter invoices by customer, date range, status
- Duplicate / re-issue invoice capability

Module 7: Payment Tracking

7.1 Customer Payment Status

Per sales order / invoice, track:

- **Paid** — full amount received
- **Pending** — no payment received yet
- **Partially Paid** — some amount received, balance remaining
 - Record partial payments with date and amount
 - Auto-calculate outstanding balance

7.2 Payment Modes

- Cash
- Bank Transfer / NEFT / RTGS
- Cheque (with cheque number, bank, date)
- UPI

7.3 Payment Records

- Each payment entry: Date, Amount, Mode, Reference Number, Notes
- Running ledger per customer (all transactions in/out)
- Overdue payments — flag invoices past due date

7.4 Supplier Payment Tracking

- Same payment tracking for outgoing payments to suppliers
- Outstanding balance per supplier

Module 8: Reports & Dashboard

8.1 Dashboard (Home Screen)

- Today's orders count
- Pending deliveries

- Low stock alerts (items below threshold)
- Pending payments (amount receivable)
- Recent activity feed

8.2 Reports

- **Sales Report** — by date range, customer, product
 - **Purchase Report** — by date range, supplier
 - **Stock Report** — current inventory levels, valuation
 - **Payment Report** — collected, outstanding, overdue
 - **Delivery Report** — delivery status summary
 - **Profit & Loss Summary** — purchase price vs selling price per order
 - All reports exportable as PDF or Excel
-

Module 9: Alerts & Notifications

- Low stock alert → notify admin + add to restock cart
 - Overdue payment alert → customer invoice past due date
 - Pending delivery alert → orders dispatched but not confirmed delivered
 - Purchase order expected delivery due
 - Notifications visible in-app; optional SMS/WhatsApp/Email alerts
-

3. User Roles (Access Control)

Role	Access
Admin / Owner	Full access to all modules
Sales Staff	Create orders, view stock, create invoices
Warehouse Staff	Manage stock, update delivery status
Accountant	View/manage billing, payments, reports only

4. Non-Functional Requirements

- **Platform:** Web-based (accessible from desktop browser); optional mobile-responsive design
 - **Language:** English (with option for regional language labels)
 - **Data Backup:** Automatic daily backup
 - **Security:** Role-based login, password protection
 - **Performance:** Page load under 3 seconds; handles up to 10,000 orders/year
 - **Offline Mode (optional):** Basic stock lookup even without internet
-

5. Data Entities Summary

Entity	Key Fields
Product	Name, Category, Dimensions, SKU, Buy Price, Sell Price, Stock Qty
Supplier	Name, Contact, GST, Products Supplied
Customer	Name, Contact, Address, GST, Credit Limit
Purchase Order	Supplier, Items, Qty, Status, Date
Sales Order	Customer, Items, Qty, Delivery Type, Status
Delivery	Order ID, Vehicle, Driver, Status, Dates, Cost
Invoice	Order ID, Customer/Supplier, Items, Tax, Total, PDF
Payment	Invoice ID, Amount, Mode, Date, Status
Stock Log	Product, Change, Reason, Timestamp

6. Future / Phase 2 Features (Optional)

- Barcode / QR code scanning for stock management
- Customer-facing portal (order status tracking)

- WhatsApp Business API integration (send invoices directly)
- Multi-godown / warehouse support
- Mobile app (Android)
- Automated reorder placement via email to supplier

This document covers all core requirements for the PVC Distributor Admin System. Each module can be developed independently in phases, starting with Inventory + Orders + Billing as the core MVP.
